# ULTRALX® AC90 Armoured *Home Run* Cables

Meets or exceeds the following requirements:
- CSA 22.2 No. 203.1 (Manufactured Wiring Systems)

Features
Multi-conductor runs from panel to junction box for lighting, power, control circuits.

Pre-wired home-run cable arrives on site ready to install. Save time and money.

Applications
Repetitive home-runs in commercial, industrial, multi-residential buildings and places of assembly.

For exposed and concealed wiring in dry locations (90°C). Suitable for cable trays and environmental air-handling spaces.

Installation in accordance with the Canadian Electrical Code Part 1.

Specification
Constructed with ULTRALX AC90 Armoured Cable (Meeting CSA Standard 22.2 No. 51-95)
600V Insulated Solid Copper Conductors (Stranded available upon request)
Polyester Tape
Aluminum Interlocking Armour
Compact and Lightweight Construction

Packaging Options
Cut-to-length whip assemblies c/w 8" tails for box connection and 60" tails for panel connection
Cut-to-length whip assemblies c/w 8" tails for box connection and 8" tails for box connection
